Purpose of Academic Advising

Our goal is to help students get the most from their college experiences. We believe academic advising is a partnership between the advisor and the student. The advisor assists undergraduate students in making responsible and informed decisions about educational plans and professional and life goals. Together we can address challenges, identify opportunities, and establish goals.

Academic Advising

Meet with your academic advisor often throughout your academic career to make sure you take the right courses at the right time, are connected to opportunities such as internships, study abroad, and other activities of interest, and stay on track to graduate. Academic advisors help you develop a plan of study and can meet with you in person, over the phone, through video conferencing, and email.

Success Coordinating

A success coordinator is a central point of contact for any questions or concerns you have, especially if your advisor is not at your USU location. A success coordinator can help you understand campus resources as well as help you with localized tutoring, campus events, the financial aid office, our wellness psychologists, finding your major advisor, and more.

Schedule an appointment at usu.edu/advisors or call your local campus or center for more information.
